Buoy® Whole Home Water Controller

A WHOLE NEW WAY TO CONNECT WITH YOUR WATER.

GET TO KNOW YOUR WATER

Water is vital to so many things we love. From cooking the pasta for your secret recipe to a refreshing drink on a hot day. To cleaning your favorite shirt or relaxing in a hot bath. But most people don't really think about water – until a leaky toilet or burst pipe ruins their day. Meet the Buoy® Whole Home Water Controller – the easy way to help prevent water damage and take control of your water usage.

Stop surprise water bills

The Buoy® Whole Home Water Controller's sensors are always looking out for things such as dripping faucets, running toilets, and silent leaks behind walls, so you can take action and save money.

Keep your home protected

From little drips to major leaks, the device alerts you if there's an issue with your water. Then the system can help you shut off your water remotely, or can shut it off automatically.

Control at your fingertips

With the Buoy app and a monthly subscription, you're constantly in the know about how much water you're using and have better control of the water coming into your home – no matter where you are.

TAKE CONTROL OF YOUR WATER IN 3 STEPS

Bouy Whole Home Water Controller
(by Resideo)

1 Install and connect

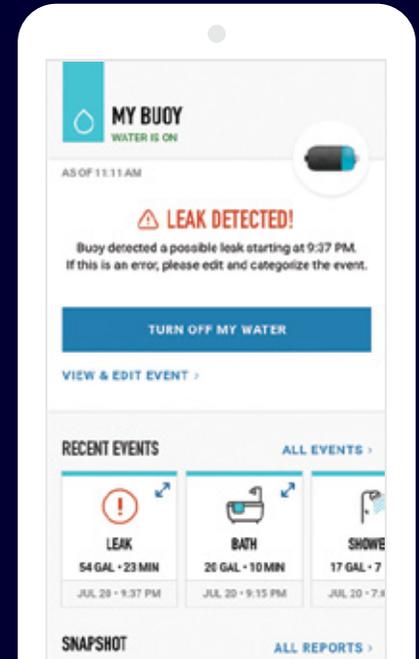

A trained professional installs the Buoy® Whole Home Water Controller on your main water line.¹ The device detects even the smallest water flow, and when you connect Wi-Fi, you can control the system in the Buoy app.

2 Log in and learn

With a monthly subscription, the app shows you how much water you use to shower, do laundry and keep your lawn green. That means you'll always know how much water you're using and when, helping you conserve water and save money.

3 Shut it off

You get an alert if the device detects abnormal water usage. Then you can take immediate action by either shutting off your water manually or remotely. Or if abnormal water usage exceeds your pre-set limits, the controller can shut off your water automatically. You can even contact a plumber directly from the app to get help fixing the problem.

93% of water damage claims could be avoided by using a leak detection device with remote shutoff.²

“It showed me how much more water we used washing dishes by hand than using the dishwasher. I always thought hand washing was more efficient!”

Sam, homeowner

GET WATER SECURITY, AT HOME AND AWAY

Buoy® Whole Home Water Controller

- Attaches to your home's main water line and installed by a trained professional¹
- Includes removable and rechargeable Lithium-ion battery (one charge lasts about a year; less than four hours to recharge)

Subscription Options

FREE: Manual water shutoff via app or device only

OR

\$9.99/month: Full water usage analytics by category (sink, toilet, etc.) and automatic shutoff capabilities

"My house had a major leak while on vacation, and the device automatically shut off the water. The toilet was flooding itself with water every 10 seconds and would have consumed 30,000 gallons if it wasn't for the Buoy® Whole Home Water Controller. It paid for itself in that one weekend alone."

Ken, large residence owner

"The device caught my water heater that sprung a leak at 3 a.m. It saved us from a lot of water damage."

Joel, single-family homeowner

¹ Professional installation is included in the purchase price.
