Honeywell F300
Electronic Air Cleaner

Built-In Reliability
One of the reasons why the Honeywell F300 Electronic Air Cleaner is the only one you’ll ever need is that it’s built by Honeywell, the most trusted name in the business. Quality materials, efficient operation, long-term service — these are all hallmarks of the Honeywell name.

Eco-Friendly
The Honeywell F300 Electronic Air Cleaner features a renewable filter so you won’t need to replace your furnace filter each month (and send the dirty ones to landfills). Simply wash the Honeywell F300 Electronic Air Cleaner’s renewable high-performance filter cell once a year and you’ll never need to buy another filter. Plus, the Honeywell F300 Electronic Air Cleaner helps save you money by keeping your heating and cooling equipment clean and extending its service life. And because it is designed to maintain excellent airflow even under a heavy load, you can count on cleaner air circulating in your home.

Simply Smart
To sum it all up, the Honeywell F300 Electronic Air Cleaner:
• is the most effective renewable air cleaner available
• saves you money through efficient operation
• saves you money, you’ll never have to buy replacement filter
• saves you the time and hassle of seeking out replacement filters
• is built and backed by the Honeywell name

Reliable and Renewable
Honeywell introduced electronic air-cleaning technology for the home, and the Honeywell F300 Electronic Air Cleaner continues to provide reliable air cleaning while benefiting the environment.

This chart shows why the Honeywell F300 Electronic Air Cleaner is the last air cleaner you’ll ever need.

<table>
<thead>
<tr>
<th>Type of air cleaner</th>

<th>Replacement interval</th>
<th>Cost per year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Honeywell F300 Electronic Air Cleaner</td>
<td>Up to 99%</td>
<td>No replacement needed; clean every 6-12 months</td>
<td>$0</td>
</tr>
<tr>
<td>Whole-House Replaceable Filter System</td>
<td>Up to 85%</td>
<td>6-12 months</td>
<td>$40 - 200</td>
</tr>
<tr>
<td>Standard 1&quot; Filter</td>
<td>Up to 9%</td>
<td>1-3 months</td>
<td>$24 - 60</td>
</tr>
</tbody>
</table>

*Capture rate against common airborne allergens from the air passing through the filter/system.

DOES AIR REALLY NEED TO BE CLEANED?
According to the Environmental Protection Agency, indoor air can be up to two- to five-times more polluted than outdoor air. A typical one-inch furnace filter traps larger particles to protect your heating and cooling system, but doesn’t trap many of the invisible particles.

The Honeywell F300 Electronic Air Cleaner features advanced multi-stage filtration technology that efficiently traps the majority of airborne particles as they pass through the system.

WHOLE-HOUSE EFFECTIVENESS
While portable air cleaners can provide a level of effectiveness in individual rooms, the Honeywell F300 Electronic Air Cleaner works with your heating and cooling system to clean the air going through your duct system. As air re-circulates, the Honeywell F300 Electronic Air Cleaner captures up to 99% of airborne dust, pollen, smoke, pet dander, mold spores and certain bacteria that can become concentrated over time compared to a standard one-inch furnace filter. And unlike portable air cleaners, the Honeywell F300 Electronic Air Cleaner is installed out of sight to work quietly and invisibly.

CLEAN, UNSEEN, SERENE.
Imagine having dust, pollen, mold spores and certain bacteria filtered by a proven, dependable air cleaner that’s out of sight and out of mind, but keeps your system running at peak efficiency.

Built and Backed by Honeywell
Along with Honeywell’s leading 5-year warranty, the F300 is backed by Honeywell’s exclusive Clean Coil Guarantee. Over time, the inner workings of your heating and cooling equipment can become coated with efficiency-robbing dust. Because the Honeywell F300 Electronic Air Cleaner captures particles before they can accumulate on critical parts in the duct system, the Clean Coil Guarantee is your assurance that system efficiency and optimum comfort will be maintained.

Imagine having dust, pollen, mold spores and certain bacteria filtered by a proven, dependable air cleaner that’s out of sight and out of mind, but keeps your system running at peak efficiency.
