For Every Job, One Solution

Universal Pilot Burner

Introducing the Universal Pilot Burner from Honeywell. The days of replacing pilot burners with like-for-like products are over.

This is going to be huge. It's the one design that can be used on nearly any Honeywell pilot burner you'll encounter. So you'll be able to replace more pilots in less time, and you'll be making your calls more profitable.

Like-For-Like Replacements and Cleanings Have Left the Building

Until now, pilot replacement jobs have left contractors with two options — replace pilots with like-for-like parts or clean the existing pilot — and neither option was ideal.

Replacing pilot burners often required ordering a replacement and returning to install it later. This left customers without their needed pilot and you, the contractor, having to return and replace a pilot instead of doing more jobs.

Cleaning the pilot takes just as long as installing a replacement, but it's only a short-term fix that increases the likelihood of a needed callback. Plus, cleaning earns a fraction of the profits you can make from replacement. Every time you clean a pilot, you're leaving money on the table.

More Gigs, Less Equipment

The Universal Pilot was designed so you'll always be confident you have the right part for the job. You won't have to spend time cleaning old pilots or waiting for a replacement to arrive. You'll be able to make

the call, replace the pilot and move on to your next job. The Universal Pilot is loaded with features that make it the go-to pilot to stock in warehouses and on your truck.

The Benefits of Stocking a Universal Line-up

The benefits of the Universal Pilot go beyond the contractor. Distributors can count on carrying an inventory that meets contractors' needs, is in demand and turns over sooner. Rather than ordering parts as they're needed, or trying to predict what parts you'll need with no guarantee

they will be used, you'll have the right part for your contractors every time.

No Opening Acts, Just Headliners

The Universal Pilot is the clear choice to make pilots easier to stock, install and complete more jobs. Honeywell is making sure you'll be able to meet the needs of your customers immediately and without the profit loss associated with just cleaning, instead of replacing, pilots. When you're ready to start playing more gigs, with less equipment, contact your Honeywell representative, or visit customer.honeywell.com.

THE UNIVERSAL FIT

The Universal Pilot offers adjustable mounting options, flexible hood orientations and the accessories needed for replacement. You'll have the right fit for almost every situation.

THE CHOICE FOR CONVENIENCE

The universal fittings and compact size of the Universal Pilot means that instead of carrying a large inventory, contractors need only carry several Universal Pilots on their trucks to be prepared for almost any pilot job.

THE TRUSTED FLAME

The Universal Pilot was designed to replace nearly any Honeywell pilot you encounter — over 100, representing 80 percent of pilots used today. Like all Honeywell Universal Replacement Parts, it was created so you could do more and carry less.

THE TIME SAVER

You can count on having the parts you need, solving your customers' problems and maximizing your profit, all with one visit.

THE PROFIT DRIVER

No more pilot cleanings or calling distributors and waiting for the right replacement pilot to arrive. The Universal Pilot is the right replacement pilot. Your jobs are done sooner and your profits grow.

REGIONAL SKUs

The Universal Pilot family consists of four SKUs designed to meet the needs of various geographical regions. Your distributor will have the Universal Pilot that is right for your area.

Honeywell Universal Replacement Parts

Look For the Blue U

All Honeywell Universal Replacement Parts feature our blue U. This means they are designed to replace a large number of parts from one or more manufacturers. You'll be ready to replace just about any part without carrying a large inventory. By relying on parts with the blue U, you'll be able to do more and carry less.

Fit right, right away.
