

COMFORT THAT'S JUST RIGHT.

Meet the T Series T10 Pro Smart Thermostat with RedLINK™ Room Sensor.

The T10 Pro Smart Thermostat allows homeowners to prioritize the rooms that matter most, helping ensure comfort where it counts. It's a smart, simple way to help your customers feel right at home.

Temperature, especially in bedrooms, is one of the biggest homeowner complaints when it comes to indoor comfort. When asked about the ability to prioritize certain rooms over others, consumers in a Resideo survey overwhelmingly agreed it was a must-have feature.

82% of consumers said prioritizing one room over another was a must-have or nice-to-have feature.

“I would love for comfort to follow me. It would be great to have that level of personalization.”

COMFORT

that fits your customers to a T.

The T10 Pro Smart Thermostat* uses RedLINK™ Room Sensors to extend the reach of the thermostat beyond the hallway, so customers can get a more ideal temperature in the important rooms in their home – like bedrooms and living spaces.

- Senses temperature, humidity and motion** to prioritize comfort in occupied rooms
- Homeowners can prioritize different rooms at different times of day
- Or, they can allow the thermostat to use geofencing to automatically optimize comfort and savings

*Communicates with RedLINK™ Room Sensors only (not compatible with other RedLINK accessories).
**Motion detection does not change programmed setpoints.

SIMPLICITY

that fits your business to a T.

Advanced connectivity and reliability

- Connects directly to the home's Wi-Fi network, enabling control through the Honeywell Home app and integration with voice-control technologies
- Communicates to RedLINK™ Room Sensors via RedLINK™ wireless technology, helping ensure a strong, uninterrupted connection between devices (*no RedLINK™ Internet Gateway required!*)

Simple installation and setup

- The UWP mounting system and common wiring interface help simplify and standardize the install process
- On-thermostat configuration, sensor pairing and Wi-Fi connection process help streamline setup

Smart features and functionality

- Works with Honeywell Home partners like Google Assistant and Amazon Alexa to provide the ultimate connected experience
- Geofencing can use the homeowner's smartphone location to tell the T10 Pro Smart Thermostat when they're away, so it can automatically switch to an energy-saving setpoint to conserve energy

T10 Pro Smart Thermostat product features

- Can control humidification, dehumidification or ventilation, allowing you to customize a solution for each customer
- Bases room prioritization off time-based scheduling, motion detection or geofencing – giving customers ultimate flexibility for optimal control
- Offers a multi-room display right on the thermostat, so homeowners can see each room's current temperature and change their comfort settings as needed

RedLINK™ Room Sensor product features

- Senses temperature, humidity and motion
- Features a 200-ft. range from thermostat to sensor, which is greater than the advertised range of other sensors
- Powerful RedLINK™ wireless signal is designed to transmit reliably through most building materials like brick, plaster and concrete
- Up to 20 sensors can be connected per thermostat

Comfort control from anywhere

With the Honeywell Home app, homeowners can create and edit schedules, prioritize rooms and see smart alerts when the temperature goes above or below their set threshold.
